

## How to secure GrowCover at the end of a frame

*Step 1.  
Securing the ends of a GrowHouse  
To close the end of a GrowHouse push a garden stake  
into the ground in the middle of the end of the garden bed*

*2. Pull the GrowCover from the right hand side across the  
end and clip the GrowCover to the garden stake at the  
bottom and top*

*3. Pull the GrowCover from the left hand side and attach it  
to the garden stake at the top and bottom. The clip should  
secure two layers of GrowCover now so you can remove the  
original clips used for the right hand side.*

*4. Bunch up the spare GrowCover near the top of the stake,  
twist it and secure to the stake or tie with string or plant  
tie .*
